

GET STARTED ON TWITTER

Twitter is a microblogging and social networking service all in one, its primary purpose is to connect people and allow people to share their thoughts with a broad audience.

Set Up Your Account and Learn How to Tweet

1. Go to twitter.com/signup. Or, download the app and be guided through the sign-up experience.
2. Once you have created your account, it's time to start tweeting!
 - *NOTE: Twitter allows photos and video, gifs, polls, emojis, and even has the ability to schedule certain posts!*
3. Twitter allows 280 characters. Be sure to include tags as well as hashtags so your tweet reaches more users!
4. On your [profile](#) you'll see a section for tweets. This is your dashboard of all your tweets that you send out. Then you'll see tweets and replies where you can keep track of all those conversations you are involved in.
5. Along the left side of your screen, you'll see more tabs:
 - Home: Which takes you to your main twitter feed where you can see all your followers and relevant content that is compatible with your interests.
 - Explore: Which shows information about content you have personally interacted with as well has current news updates.
 - Notifications: This tab allows you to know when people like, retweet or comment on your posts.
 - Messenger: Allows you to private message twitter users.
 - Bookmarks and Lists: create specifically around your favorite topics!
6. TIP: Use Twitter Threads. When tweeting, it's important to utilize this tool. It allows for you to add more relevant content to an already posted tweet. As well as leave room for other users to comment too.
7. Follow [@FightCRC](#), as well as relevant hashtags such as [#StrongArmSelfie](#) and [#RelentlessChampions!](#)

Twitter moves fast, but the app makes it easy to keep up with your interests, see what people are talking about and join in on the conversation!
