He was a hard worker, a champion of kindness, and a respected volunteer in his community. We will always fight in his honor because he deserved so much more. In honor of

Colleen Scala Blake

She almost canceled the colonoscopy that the Dr scheduled for that day, after all she had no symptoms, only thing the Doctor was looking for was to see why her iron levels were low. She went because her Father , brother and sister had died of colon cancer at young ages, and something told her to go get checked. Divine intervention ? Perhaps... who knows ? Because , even though the insurance was not covering her test , she went... only to discover that she had Stage 3 Colon Cancer . With no symptoms at all. This would began her journey for the fight for her life. Which thankfully, after countless surgeries she survived and is remission to this day. Had she cancelled that test she would have no doubt died at a young age like her loved ones before her. This lady is one of the strongest and bravest people I've ever meant. As during her many medical treatments and surgeries I never once heard her complain or see her cry. Even when she was diagnosed with Stage 3 Breast Cancer shortly after her colon cancer remission. By the grace of God she is still with us today, smiling her beautiful smile and sharing her story of how her life was saved by a colonoscopy and encouraging everyone who will listen to get tested. Those of us who know her thank God every day for the Doctors , nurses and the treatments that saved her life and pray those that are fighting this fight , never give up and always keep fighting.

Colleen Scala

Even though I would give anything to hear your laugh again, see you smile, hear you belt out like an opera singer in church, make silly faces behind Mom, be able to give you a hug, or to just have you to talk to, I know deep down your experience has prepared me for who I became and who I continue to become. In honor of

Raegan M. Downing

Raegan is the epitome of a fighter, with unequalled determination and resolve, especially when it comes to the health of herself, her family and other loved ones. To God, Raegan's challenge, as well as ALL the challenges of humanity, from the beginning of creation, were known and are known by Him. He allows all challenges to occur, for two reasons: Firstly, to give opportunities for all people to draw closer to Him, and to accept Him as savior, thereby ensuring ETERNAL life, versus ETERNAL death. Secondly, to bear witness (give testimony) to the non-believers, so that they too may have the choice to accept the inheritance of life over death. To our dear dear daughter, Raegan, and all the others.....their battles belong to the Lord. Submit to God, daily. The struggle will be eternally worth it. We love you so much. Dad & Mom

Dear Kristine, It has been a long and difficult year since you were first diagnosed. I am amazed how you persevered and maintained as normal a life as you could. You walked new trails, learned new crafts and exercises while supporting others who found their lives changed by this disease. Know that you have family and friends supporting you along the way to your recovery. I love you and am here for you and Elsa always. Love, Eileen (Mom L.)

Elsa Lankford

In honor of

Kristine Dunkerton

As a kid, Kristine is the kind of person I wanted to be when I grew up. She is super smart, kind, funny, generous with her time, a great cook, and is always up for an adventure. All of these traits (and many more which there is not room to list) make her such a joy to be around. She builds a community wherever she is, fostering connections between people to lift them up, heal, and find their joy. She has endless enthusiasm and energy which she focuses on making the world a better place, professionally and personally, no matter what she is doing. I am so lucky to be able to call Kristine a friend and to see her superpowers in action in my own life and others. We all hope you feel the love Kristine - it is just a small portion of what you give out to others each and every day!

Gillian Armstrong

In honor of

Kristine Dunkerton

There really doesn't seem to be a wall that could possibly be big enough to honor you! You are one of the most courageous, proactive people I have ever had the fortune of knowing. When you are handed a new challenge with this cancer, you go right into plan and attack mode (Elsa too!). You do all the things you possibly can to promote your own health, while encouraging others who are fighting their own battles. You have an innate ability to network with people, and I have no doubt you have improved the lives of many, and will continue to do so. You bring such a positive energy to this world, and I am so lucky to call you my friend!

Kristin Morrissey

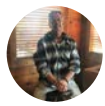

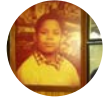

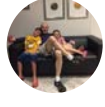

In honor of

Kristine Dunkerton

Dear Kristine You are one of the most amazing person I have ever met - your positive attitude even though I know at times it is so hard to remain that way, your dancing during treatment which I haven't seen in person yet (but will soon) and your absolute support and just being such a loving wonderful friend has been a life saver ! Love both you and Elsa!! Lisa Astrin

Borrowing words I read at your funeral, "He was my North, my South, my East and West, My working week and my Sunday rest, My noon, my midnight, my talk, my song; I thought that love would last forever: I was wrong. In memory of **Benjamin Shackley**

Ben, oh how we miss you. You were 24 and the doctor kept saying it was "just diverticulitis"- he kept changing your treatment- he finally did a colonoscopy but did a poor job we later learned. I have said "If Only" at least a million times. If only we had gotten another opinion when you weren't getting better. But "someone your age doesn't get colon cancer they said" Well, yes they do. 4 months later a doctor friend said let me do a scope to just look. Hours later he came out and said "Ben has stage 4 colon cancer- he needs to start treatment right away" We were in shock but found a good oncologist and began. You fought so hard. We never heard you complain- only saw you cry once. You would get so sick, but still want that Big Mac after chemo knowing when you got home it was coming back up. You fought for almost two years and the chemo wasn't working. You were on a massive amount of pain medication but never complained once. You are our hero. Two of your brothers have a Superman logo tattoo with your name over it. You will always be my baby Ben and I can't wait to walk into Heaven and put my arms around you again. You are missed by mom, dad, brothers all those nephews & nieces (Especially Britt) and so many friends. You were a hero to many. I love you son. —Mom

In memory of

Robin E. Tyler

This week, this Wall of Champions is dedicated to all lives lost to this treatable, preventable disease. This Wall of Champions serves a purpose of awareness and honor. It is my difficult honor to help promote self advocacy and help spread awareness about colon cancer. What would you have done differently if colon cancer was talked about openly and comfortably? What if those symptoms, that seemed similar to after childbirth or pregnancy, had been taken seriously? What if your words about what was happening in your intestines was heard? What if someone was listening and said, Yes~ you can be a 30 year woman with colon cancer. Yes~ you have family history. Yes~ you can have symptoms or have no symptoms. Yes~ you can be a 30 year old woman with colon cancer. I don't want anyone else to be left wondering. Over the past 13 years I have been a Colon Cancer advocate, unfortunately sharing my story of losing one of my best friends ~my sister~ to help stop this disease from becoming the number one cancer killer in our country. You are always in my heart, Robin.
